DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/3/2008 has been entered.

Response to Arguments

2. Applicant's arguments filed 3/3/2008 have been fully considered but they are not persuasive. Claims 13, 24, and 26-27 remain rejected under 35 U.S.C. 101. A computer node is not a tangible embodiment.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 13, 24, and 26-29 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 13, 24, and 26-29 are directed toward a computer node, without any tangible structure. A computer node is broadly readable upon computer software without any tangible embodiments. Applicant should contact the Examiner prior to the next amendment in order to place this application in condition for allowance.

Claim Objections

5. Claim 3 is objected to because of the following informalities: Claim 3 is dependent upon claim 2, which has been cancelled and moved into claim 1. Claim 3 is treated as being dependent upon claim 1. Appropriate correction is required.
6. Claims 4 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2145

Allowable Subject Matter

7. Claims 1, 5, 15-18 are allowed.
8. The following is a statement of reasons for the indication of allowable subject matter: Applicant claims the transmission of heartbeat acknowledgment messages with a sequence of state information transmitted within the heartbeat acknowledgement message, and retrieving state information for heartbeat acknowledgement messages. This is not taught in the prior art.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
